

Firmware Upgrade THURAYA XT-PRO

Requirements:

- Thuraya XT-PRO
- XT-PRO upgrader program
- USB data cable (included in your XT-PRO packaging)
- PC with Windows 10, Windows 8/8.1, Windows 7 or Windows Vista

Before upgrading an XT-PRO, please check which firmware is installed (go to Menu > Security > S/W version). Perform the upgrade only if Thuraya releases a firmware version newer than your existing one.

Step 1

Download the Thuraya XT-PRO installer program.

Run the setup file - the Upgrader program including the USB driver will be installed.

Step 2

Download the latest Thuraya XT-PRO firmware release to your hard disk.

Multi-language firmware v1.9
(for IMEI 35610706-200001 up to 35610706-700000)

XTP2_v1.9_ML_TH Release Notes:
VDA connection improvements
Roaming SIM card compatibility

Step 3

Connect your XT-PRO with the PC/laptop via USB data cable.

You can now start the XT-PRO Upgrader program and locate the firmware on your hard disk. The Upgrader program will help you through the upgrade process.
