## USING THURAYA XT AS DATA MODEM

source: [www.thuraya.com](http://www.thuraya.com)  
date: 16.04.2019

### Step 1

Download the below Thuraya XT Upgrader program, which also contains the required driver for connecting your Thuraya XT to a PC or laptop to use the Internet in satellite mode via the XT.

**IMEI of the XT phone to upgrade is between 356978 02 100001 - 356978 02 199999:**  
Thuraya XT upgrader v1.6

**IMEI of the XT phone to upgrade is greater than 356978 02 200001**  
Thuraya XT upgrader v1.7

Run the setup file - the Upgrader program including the USB driver will be installed.

### Step 2

Installing the Thuraya XT modem on a PC or laptop:

- Connect your Thuraya XT with the PC/laptop via USB data cable
- Select **Start > Settings > Control Panel > System > Device Manager**
- Check the USB serial port of SatSleeve (e.g. COM40)
- Select **Start > Settings > Control Panel > Phone and Modem**
- Select the Modems tab and press **Add**
- Check the box of "Don't detect my modem; I will select it from a list." and press **Next**
- Select and press Standard 56000 bps Modem and press **Next**
- Select the USB serial port that you previously checked on step 3 and press **Next**
- When the modem installation is completed, press **Finish**

### **Step 3 - For Windows XP, Windows Vista and Windows 7**

Creating a dial-up connection:

- Select **Start > Settings > Control Panel > Network and Sharing Center**
- Select and press **Set up a new connection or network**
- Select and press **Set up dial-up connection** and then **Next**
- Enter **\*99#** on the Dial-up phone number field. (Optionally you can enter user name and password)
- Enter connection name and press **Connect**
- Use the Internet via the newly created dial-up connection.

### **Step 3 - For Windows 8/8.1**

Creating a dial-up connection:

- Select **Start > Control Panel > Network and Sharing Center**
- Select and press **Set up a new connection or network**
- Select and press **Set up dial-up connection** and then **Next**
- Select and press **Connect to the Internet** and then **Next**
- Select and press **No, create a new connection** then **Next**
- Select and press **Dial-up Connection** then **Next**
- Enter **\*99#** on the Dial-up phone number field. (Optionally you can enter user name and password).
- Enter connection name and press **Connect**
- Use the Internet via the newly created dial-up connection.

### **Step 3 - For Windows 10**

Creating a dial-up connection:

- Select **Start > Control Panel > Network and Internet > Network and Sharing Center**
- Select and press **Set up a new connection or network**
- Select and press **Connect to the Internet** and then **Next**
- Select and press **Set up a new connection** anyway
- Select and press **No, create a new connection** then **Next**
- Select and press **Dial-up (Connect using a dial-up modem or ISDN)**
- Enter **\*99#** on the Dial-up phone number field. (Optionally you can enter user name and password).
- Enter connection name and press **Connect**
- Use the Internet via the newly created dial-up connection
